

Office of the Sark Electricity Price Control Commissioner

Notice

11th December, 2018

I have yet to receive a response from Sark Electricity Limited to my request for an explanation of why customers have been charged 66 p/kWh for electricity sold in November, 2018. Nevertheless, I trust that SEL will either return the overpayment to customers who have already paid, or provide a credit against the January bill. I suggest that those who have not yet paid their November bill contact SEL for confirmation.
