Proposal from Sark Electricity Limited

Dear Residents of Sark,

I am writing to let you know that SEL's response to the Proposed Variation to the PCO, which was received on Monday, suggested the introduction of a new tariff arrangement.

Currently, my Office is examining the proposal in detail. At first glance, it would appear to spread the fixed costs of electricity supply more evenly across SEL's customer base. It was outlined to customers at the Island Hall meeting on 2nd July this year. Any worked up proposal to regulate this new arrangement will, of course, be distributed for consultation with SEL, residents of Sark and other interested parties, in due course.

Anthony White
