

Office of the Sark Electricity Price Control Commissioner

Notice

Thursday, 12th April, 2018

I published my proposed determination on electricity prices on Sark on the 14th March, 2018. You may recall that I had reached the preliminary conclusion that the current basic tariff of 66p/kWh, and prices for larger customers, are not fair and reasonable. I requested comments from interested parties by 29th March and then extended it to 12th April following a request from Collas – Crill, who act for Sark Electricity Limited (SEL), who sought further information. I have now received another request for information relating to the costs of electricity generation and other matters. In order to give sufficient time to SEL to consider this information, I am extending the consultation period until 30th April, 2018. This extension applies to all interested parties.

Anthony White
